Art Unit: 1762

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuo et al in view of Pellerite et al.

Matsuo et al, col.11, line 18 to col.13, line 40, teach coating fluorinated silanes onto metal oxides. The claimed fluorinated silanes are not shown. Pellerite et al, col.2, line 40 to col.4, line 40, disclose the claimed fluorinated silanes. It would have been obvious to substitute the claimed fluorinated silanes for those of Matsuo et al in view of Pellerite et al, because it is not apparent that unexpected results would have been obtained.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
